BONAFIDE CERTIFICATE

Certified that this mini project "**Movie Ticket Booking System**" is the bonafide work of "**MADHU PREETHA A(2116220701152)**" who carried out the project work under my supervision.

SIGNATURE

Mrs. JANANEE V,

Assistant Professor,
Computer Science & Engineering
Rajalakshmi Engineering College
Thandalam, Chennai -602105.

Submitted for the End semester practical examination to be held on _____

INTERNAL EXAMINER

EXTERNAL EXAMINER

ACKNOWLEDGEMENT

I express my sincere thanks to my beloved and honourable chairman **MR.S.MEGANATHAN** and the chairperson **DR.M.THANGAM MEGANATHAN** for their timely support and encouragement.

I am greatly indebted to my respected and honourable principal **Dr. S.N.MURUGESAN** for his able support and guidance.

No words of gratitude will suffice for the unquestioning support extended to us by my head of the department **Dr. P. KUMAR**, for being ever supporting force during my project work.

I also extend my sincere and hearty thanks to my internal guide **Mrs. JANANEE V** for her valuable guidance and motivation during the completion of this project.

My sincere thanks to my family members, friends and other staff members of Computer Science and Engineering.

Madhu Preetha A 2116220701152

ABSTRACT

The Movie Booking System is an online platform designed to make booking movie tickets easy and efficient. Users can browse movies, check showtimes, select seats, and make secure payments from any device. The system features user authentication, interactive seat maps, and instant booking confirmations. It also includes an admin interface for managing movie listings and tracking bookings. By automating the booking process, the system enhances convenience and reduces manual errors, providing a streamlined experience for both users and theater operators.

CHAPTER 1

INTRODUCTION

1. INTRODUCTION

The Movie Ticket Booking System is an intuitive platform designed to simplify the process of booking movie tickets. Users can log in to their accounts, browse a selection of movies, and view detailed information about each film, including the cast, crew, director, and a brief description of the genre. Once a movie is selected, users can proceed to book tickets by choosing their preferred seats. Additionally, the system allows for the booking of food and beverages, enhancing the movie experience. After confirming selections, the system generates a bill, and with a simple confirmation step, an alert box will notify users of a successful booking.

1.2 SCOPE OF THE WORK

The scope of the **Movie Ticket Booking System** includes the following key aspects:

1. **User Authentication:** Secure login functionality for users to access their personalized accounts.
2. **Movie Selection:** A comprehensive list of movies with details such as cast photos, crew information, director, and a brief description of the movie genre.
3. **Seat Selection:** Users can view available seats and select their preferred seating options.
4. **Food and Beverage Booking:** The system offers the convenience of pre-booking food and beverages to enhance the movie experience.
5. **Bill Generation:** An automated bill is generated based on the tickets and additional services selected by the user.
6. **Booking Confirmation:** A confirmation option ensures users can finalize their booking with ease.

7. **Success Notification:** An alert box confirms successful booking once the process is complete.
8. **User-Friendly Interface:** The system is designed for ease of use, providing a smooth and intuitive booking process.
9. **Multi-Platform Accessibility:** The system can be accessed from various devices like smartphones, tablets, and computers.
10. **Scalability:** The platform can accommodate growing numbers of users and movie selections as the business expands.

1.3 AIM AND OBJECTIVES OF THE PROJECT

The aim of the Movie Ticket Booking System is to provide users with a seamless and efficient platform for booking movie tickets. It seeks to enhance the user experience by offering an easy-to-navigate interface for selecting movies, seats, and additional services like food and beverages. The system aims to simplify the booking process, ensure secure transactions, and provide instant confirmation, making movie-going more convenient and enjoyable for users.

Objectives:

The objectives of the **Movie Ticket Booking System** project are:

1. **Simplify Ticket Booking:** Provide a streamlined, user-friendly interface for booking movie tickets online.
2. **Enhance User Experience:** Offer detailed movie information, including cast, crew, and director, with options to pre-book food and beverages.
3. **Facilitate Secure Transactions:** Ensure secure user authentication and safe online payments.
4. **Seat Selection:** Allow users to view and select their preferred seats for a customized movie experience.
5. **Automated Billing:** Generate detailed bills for movie tickets and additional services, such as snacks and beverages.
6. **Real-Time Confirmation:** Provide instant booking confirmation through an alert box, ensuring users are aware of successful bookings.
7. **Multi-Device Accessibility:** Ensure the platform is accessible across various devices like smartphones, tablets, and desktops.

CHAPTER 2

SYSTEM SPECIFICATIONS

1. HARDWARE SPECIFICATIONS

Processor :	Pentium IV Or Higher
Memory Size :	128 GB(Minimum)
HDD :	40 GB (Minimum)

2. SOFTWARE SPECIFICATIONS

Operating System :	WINDOWS 7 AND PLUS
Front - End:	HTML, CSS, JAVASCRIPT
Back - End :	PHP, MYSQL

CHAPTER 4

MODULE DESCRIPTION

User Authentication Module:

- Handles user registration, login, and authentication processes. It ensures secure access to personalized accounts, storing user details and preferences.

Movie Information Module:

- Displays detailed information about available movies, including movie posters, cast and crew photos, director details, and a brief description of the movie genre. This module enables users to make informed movie choices.

Seat Selection Module:

- Allows users to view available seating options within the theater and select their preferred seats. A visual representation of the seating layout helps users choose seats efficiently.

Food and Beverage Module:

- Provides users with the option to pre-order food and beverages for their movie experience. Users can browse available snacks, select quantities, and add them to their booking.

Booking and Billing Module:

- Manages the ticket and service booking process, generating an itemized bill for selected tickets, seats, and additional services like food and beverages. This module also handles payment processing securely.

Booking Confirmation and Alert Module:

- Once the booking is completed, this module generates a confirmation message and displays an alert box notifying users of successful booking. This ensures the user is informed of the final status of their transaction.

Gold Membership Module (₹ 999 per month):

- The Gold Membership Plan (₹ 999 per month) offers 2 hours of access to a premium lounge and a gourmet menu with a live kitchen, ensuring a luxurious pre-movie experience. Members enjoy a 30% discount at Burger King™, 15% off online ticket bookings, and a complimentary movie ticket every month. A dedicated counter for Gold members ensures priority service, and members' names are displayed in gold for a personalized touch. This plan combines exclusive perks, discounts, and premium services to elevate the movie-going experience.

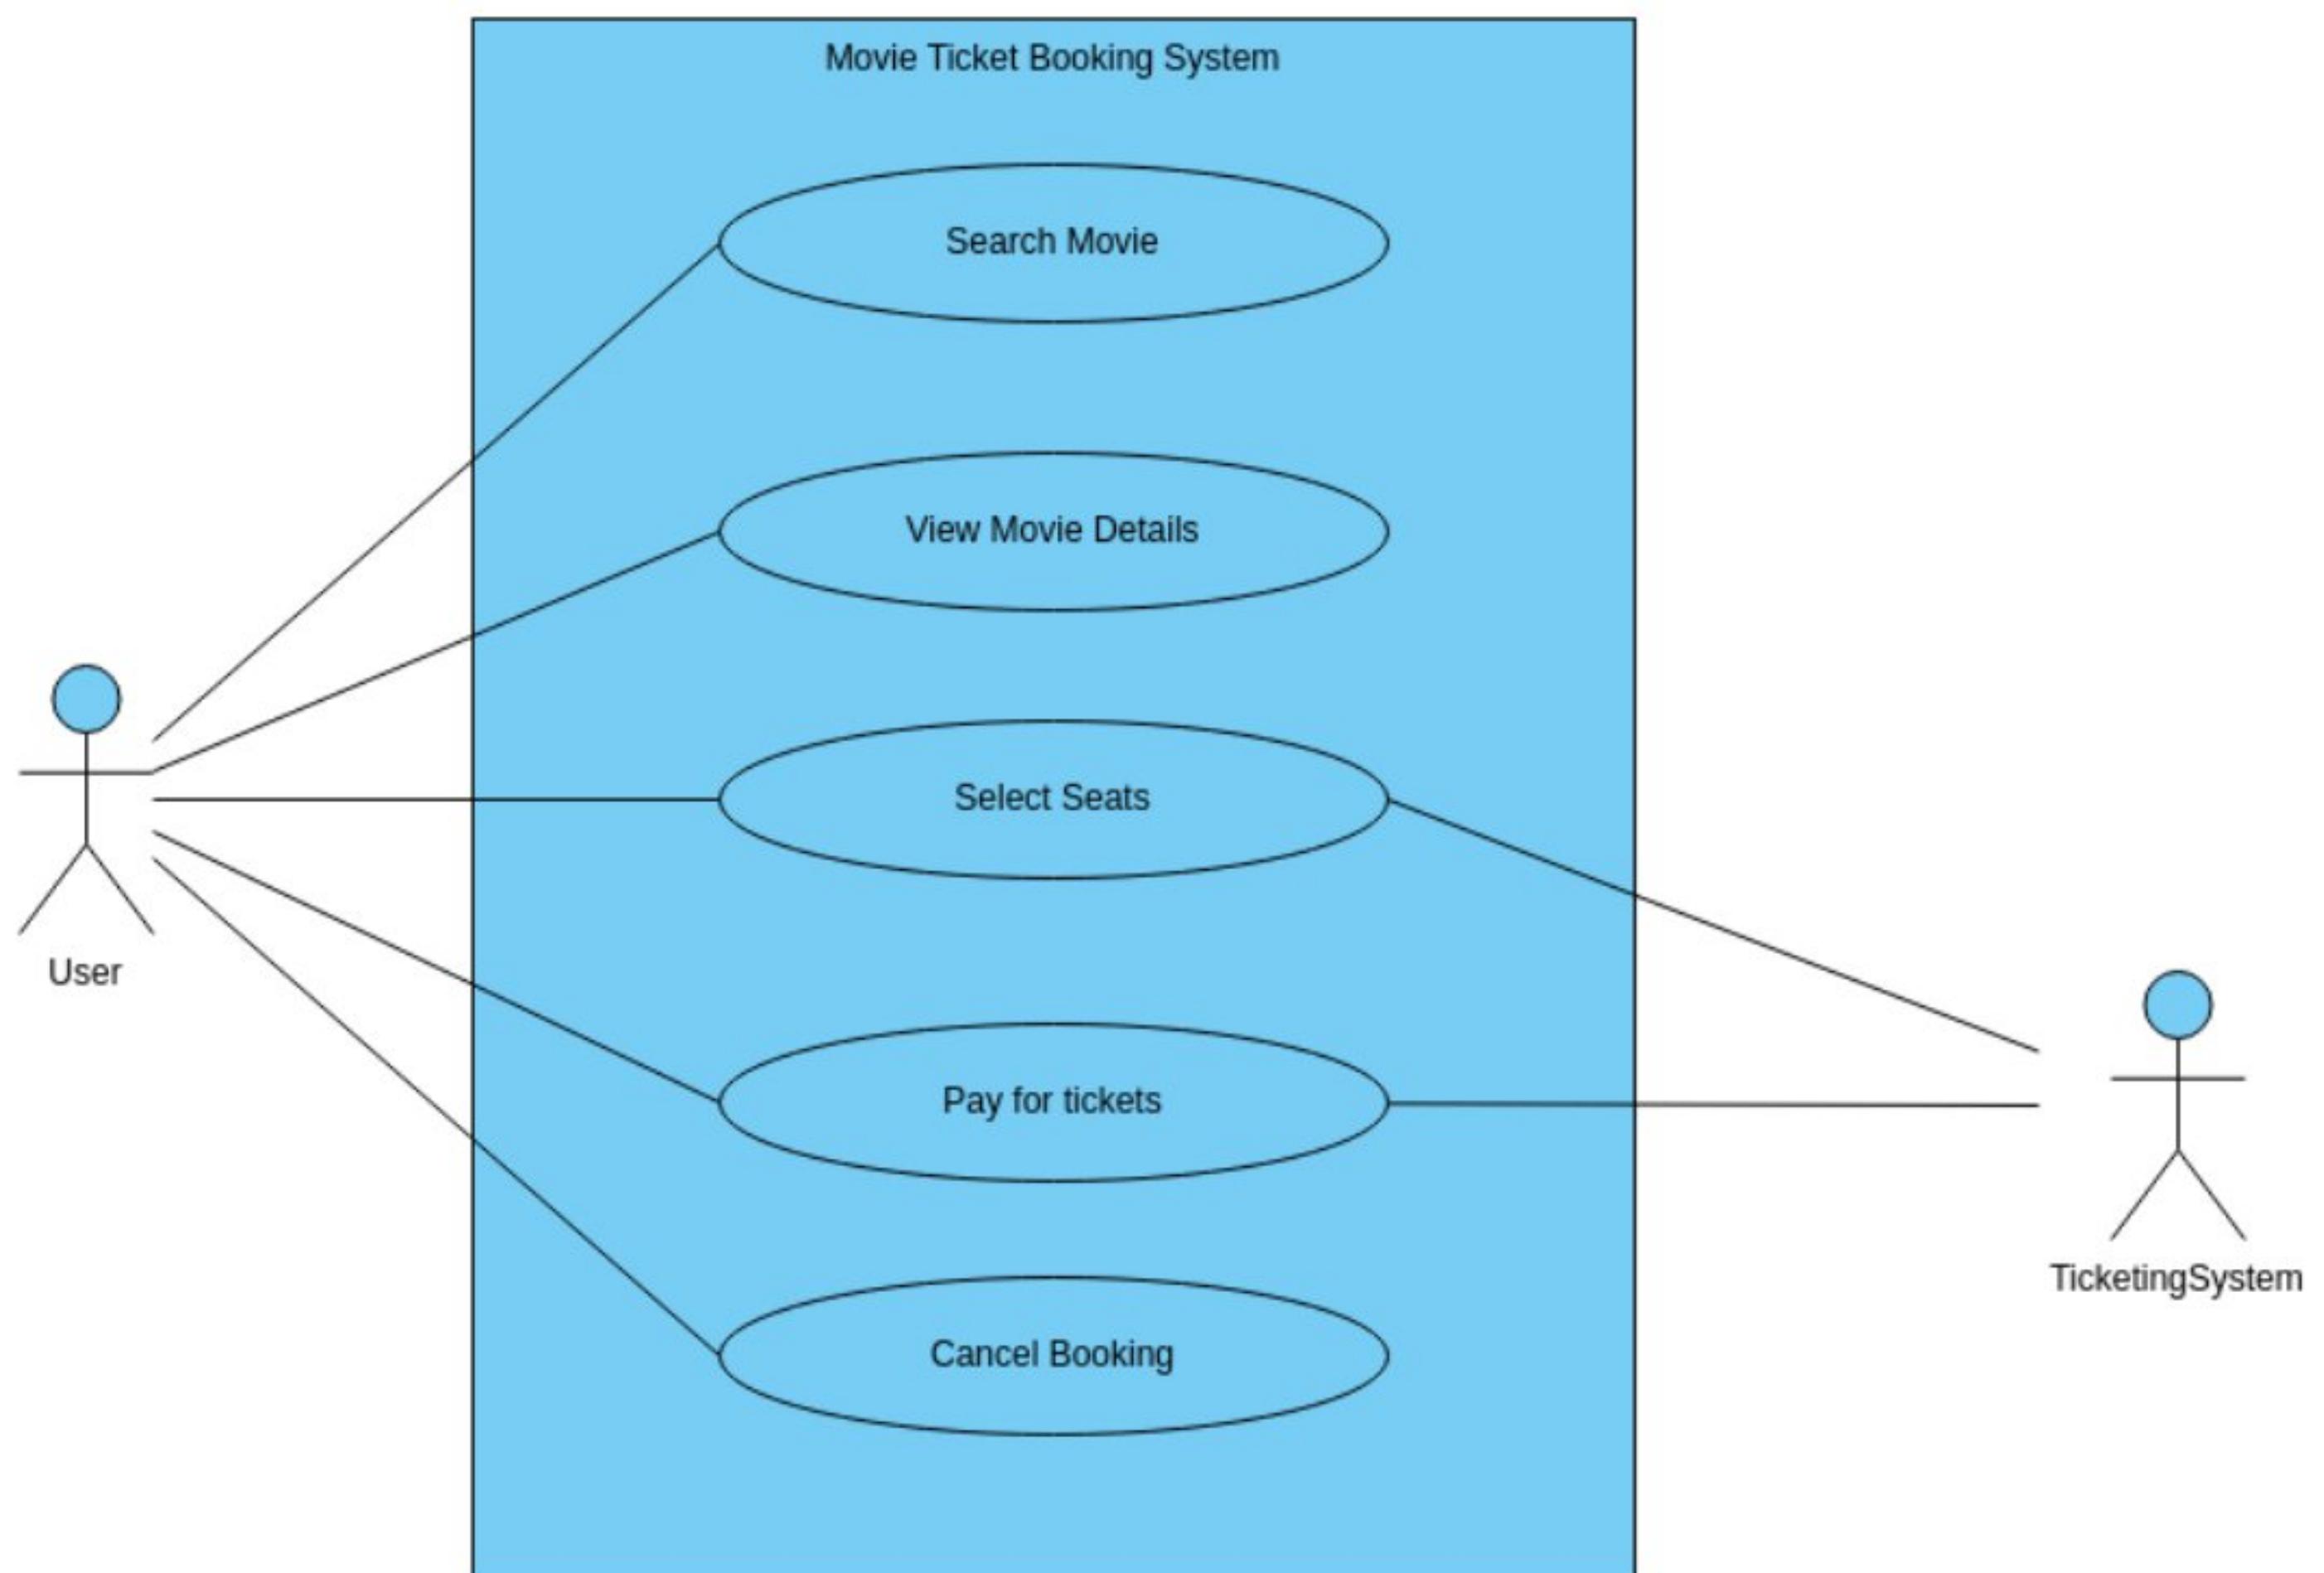

Silver Membership Module (₹ 499 per month):

- The Silver Membership Plan (₹ 499 per month) offers 1 hour of access to a premium lounge, providing a comfortable space to relax before your movie. Members can indulge in a gourmet menu featuring freshly prepared meals from a live kitchen. Enjoy a 15% discount at Burger King™ and an 8% discount on online ticket bookings. Each month, members receive one complimentary movie ticket, enhancing their entertainment experience. Additionally, members' names are displayed in silver, adding a personalized touch to their profile.

A screenshot of a Microsoft Edge browser window. The address bar shows the URL: "localhost/Movie-Booking-Website-Main/Movie-Booking-Website-main/220701152_Project/book/final.php". The main content area of the browser is mostly blank, but a modal dialog box is centered on the screen. The dialog box has a white background and a thin gray border. At the top left, it says "localhost says" in bold black font. Below that, the text "Booking Successful!" is displayed. At the bottom right of the dialog box is a blue rectangular button with the word "OK" in white. The browser interface includes a tab bar with four tabs: "Home-DW Cinemas", "localhost / 127.0.0.1 | phpMyAdmin", "localhost / 127.0.0.1 / dreamwork", and a blank tab. The standard Microsoft Edge toolbar is visible at the top, including icons for back, forward, search, and refresh.

CHAPTER 8

CONCLUSION

The Movie Ticket Booking System project successfully achieves its primary goal of providing a streamlined, user-friendly platform for booking movie tickets, enhancing the overall experience for users. By integrating essential features such as user authentication, detailed movie information, seat selection, food and beverage pre-booking, and secure payment options, the system makes the process of booking tickets both convenient and efficient.

One of the standout features is the inclusion of personalized membership plans, such as the Gold and Silver Memberships, which offer exclusive benefits tailored to enhance the movie-going experience. These memberships provide added value through premium perks like lounge access, discounts on partner restaurants, early seat booking, and complimentary tickets, all while maintaining a high level of service and personalization. The dedicated counters for members and the display of their names in gold or silver create a unique sense of VIP treatment, contributing to the system's appeal.

The system's architecture also takes scalability into account, ensuring that it can accommodate a growing user base, movie selection, and partnerships with food and beverage providers. The addition of features like About Us further enriches the platform by creating transparency, building trust, and giving users a deeper understanding of the platform's mission and values.

Overall, the Movie Ticket Booking System not only meets the core functional requirements of ticket booking but goes beyond by offering personalized services, making it an ideal solution for movie enthusiasts. The platform's flexibility, user-friendly interface, and integrated services make it a scalable, reliable, and enjoyable system that can continue to evolve with the changing needs of the entertainment industry.
